

Bassi Logic™

A Monumental Leap for NiTi Files.

Continuous Rotary Single-file System

Bassi Logic™ is a single file continuous rotary NiTi system created for simplicity. In fact, it is shown to have greater performance and safety than single-file reciprocating file systems. Since its introduction, 6,500 clinicians have already found it to be the most advanced, yet simplest endodontic file they have ever used.

Advanced Heat Treatments for Controlled Memory

At Bassi, we use a proprietary heat treatment process for achieving the strongest cyclic fatigue and high torsional resistance. The resulting controlled memory can negotiate any curved canal with conservative preparation. With Bassi Logic™ it only takes a single shaping file to prepare the entire root canal.

Unique Cross-Sections = Unmatched Sharpness

Every file is designed with a specific helix that promotes the highest cutting efficiency and reduces the screwing effect as much as possible. Studies have shown Bassi Logic™ completes instrumentation in a third less time than leading single file systems†.

3.5x the Cyclic Fatigue Resistance

In comparative studies, Bassi Logic™ files have been shown to have significantly greater resistance to cyclic fatigue and high torsional resistance when compared with other single file systems*.

a big deal.**

“After 4 years using the Logic system every day, I can say there isn’t a safer and more efficient instrument available in the market. Everybody wins – patients, professionals and Endodontics itself.”

Hugo Bastos, DDS

“Life changing! I’ve been practicing Endodontics for over thirty years and Bassi Logic instruments have transformed my practice, both in performance and profits.”

Catherine A. Hebert, DDS
